Summary: -

Fresher Frontend Developer studying creating responsive, user-centered web applications with a focus on performance and aesthetics. Skilled in HTML, CSS, JavaScript, and popular frameworks like React and Vue.js. Known for translating UI/UX designs into high-quality, interactive interfaces while optimizing code for speed and scalability. Collaborative team player with a keen eye for detail, strong debugging abilities, and a passion for delivering seamless user experiences across devices. Proficient in version control (Git) and agile methodologies, committed to staying current with emerging trends in web development to provide innovative solutions.

Experience: -

Front-End Developer:-

1. Developed and Maintained User Interfaces:

- Translated wireframes and prototypes into interactive, responsive web applications using HTML, CSS, JavaScript, and frameworks such as React and Vue.js.
- Worked closely with designers and backend developers to integrate APIs, ensuring consistency between front-end interactions and backend responses.
- Reduced page load time by 30% by implementing lazy loading, code-splitting, and optimizing assets, enhancing the user experience across devices.

2. Led Frontend Development for Key Projects:

- Spearheaded the development of a client-facing dashboard application that helped track analytics, resulting in a 20% improvement in client engagement.
 - Managed a team of 3 developers, assigning tasks and conducting code reviews to ensure code quality and consistency.
 - Implemented A/B testing and gathered data to refine UI features based on user interactions, leading to a 15% increase in user retention.
-
